Get fit and have fun with yoUVsport

...Welcome to **yoUVsport**; A new dimension in sporting activity.

UV Gear was formed in 2002. With an international trading history that spans 15 years we remain at the forefront of many UV related product developments.

The company is a global market leader in the field of UV LED lighting. We have applied our lighting expertise to create durable, high-power UV Floodlights for use in sporting arenas and leisure destinations. With full IP65 Rating and a range of output frequencies to choose from, our lighting units have allowed creative people to open up all sorts of new opportunities. **yoUVsport** is one such phenomenon.

What is it?

Simply put, we take traditional games and activities and give them the futuristic "TRON" treatment to turn everything neon. The end product completely captivates the eye and sends young heartbeats racing!

yoUVsport has a mesmerising and almost magical property. It will very quickly attract and engage a new generation of participants. It will also revitalise passion for your game from long-term players and converts. Any feelings of hesitancy and apathy are immediately sidelined by the visual impact of **yoUVsport**. The responses we have witnessed from people of all ages have been both rewarding and unequivocal.

Check out our list of activities that can be converted or "raved up" for maximum impact. UV Gear can offer you permanent or temporary installations, road-show lighting rigs and much more. In support of our lighting systems we manufacture and import a complete range of accessories and products to bring your event to neon life! We are the original and leading 'one-stop-shop' for Glow Sports Products and Lighting both in the UK and internationally.

What can it do?

You want to bring young people into your sport. You want to promote the fun side of participation in that sport. The activity remains the same but converting it to a **yoUVsport** enhanced activity is a great way to do this. Some of our sport customers are even running **UV-only** tournaments!

And here's another thing to consider! Playing sport in UV light can sharpen your senses; improve hand-to-eye co-ordination and build up spatial awareness skills. We are commissioning further research on this right now!

UV Gear is the approved supply partner for England Volleyball, Table Tennis England and Badminton England. We also work with a number of US organisations including Xglosive Tennis – An American Tennis Success Story!

We continue to advise and supply hundreds of Football Clubs, Universities, Schools, Councils and Community Foundations with specialist glow sports expertise and equipment. We manufacture our own lighting and offer full warranty on all our products.

What's next?

Talk to us! Tell us what you want to achieve and let us come up with a multiple benefit solution.
